## PROFESSIONAL PROFILE

Junior Full Stack Web Developer and Bachelor's Degree holder in Business Informatics, focused on building modern, responsive, and functional web applications using React, Node.js, and MERN stack technologies. I have 6–8 months of hands-on experience developing applications with React, integrating REST APIs, creating web layouts, designing user interfaces, and building dynamic systems.

I combine technical knowledge with experience in graphic design and visual communication, allowing me to create clear, attractive, and user-oriented digital solutions. I am currently continuing to strengthen my web development skills through real-world projects, modern interfaces, and websites for digital environments.

## EXPERIENCE

### Independent Technical Support Specialist

El Paraíso and Danlí, El Paraíso

2022 – Present

- Resolved technical issues related to software, applications, and systems.
- Installed and configured development environments and software applications.
- Optimized computer performance for running systems and development tools.
- Assisted users and gathered basic technical requirements.

### Graphic Designer / UI Designer

2025-Present

- Designed advertising materials, visual content, and graphic assets for digital communication.
- Created visual interfaces, prototypes, and UI resources using Figma, Photoshop, and Illustrator.
- Developed visual identity and graphic elements for digital platforms.
- Designed and adapted content for social media, websites, and digital media.
- Participated in the creation of websites by combining visual design, content structure, and responsive layout development.
- Collaborated on projects that integrate graphic design, user experience, and web development.

## EDUCATION

### Bachelor's Degree in Business Informatics

National Autonomous University of Honduras

Degree obtained

## TECHNOLOGIES & TOOLS
